

## Penetration Security Assessment

Penetration Testing is an effective and proven method for finding and fixing security weaknesses before being exploited by cybercriminals and hackers. By simulating real-world cyberattacks, penetration tests uncover weaknesses in systems, networks, and applications. Allowing organizations to prioritize budget, resources, and time to improving your cybersecurity posture.

### Why Test Your Organization

As a professional business you secure valuable information about your clients, personnel, and sensitive financial information.

1 in 5 Americans are victim of ransomware

\$4.88M Average Cost Of Data Breach

Every 39 seconds a hacker attack occurs

Know Your Vulnerabilities Awareness is Critical

Meet Compliance Regulations for your Vendors

### Collective Advantages

- Experience – over 30 years of penetration testing experience
- Expertise – Our team holds various certifications and hands on experience
- Specialized in Healthcare, Government, Education and Mid-Sized Businesses.
- Customized reporting includes alignment to NIST SP-115, featuring detailed findings with screenshots, tailored remediation recommendations, and actionable documentation to prioritize and manage risk.

### About Our Company

CyberForceIQ has provided information security services for over three decades.

Every business is unique, which is why we meet you where you are in your cybersecurity journey, and tailor our solutions to your needs.

#### External Testing

- > Focus is on assessing your systems as an external hacker
- > Acting as an external threat to identify and exploit weaknesses
- > Hands on manual testing with tools and techniques to penetrate your environment

#### Internal Testing

- > Focus is on assessing your systems from the inside, as a hacker who has gained access to your network
- > Attempting to gain higher level access on compromised systems
- > Attempting lateral movement inside your network

#### Additional Services

- > Web Application Penetration Testing
- > Wireless Penetration Testing
- > Physical Social Engineering
- > Phishing Social Engineering

"The CFQ's Pen Test service was thorough to identify any possible vulnerabilities from cyberspace, physical penetration, or through social engineering. CFQ is great to work with as a trusted cybersecurity partner."

-Rene Hinojosa, Director of Technology Services | City of Southfield
